Story basics:
All four of the story lines center around a general theme of an Evil Antagonist "Xander" pitted against the Protagonist "Adam". Through the course of the story, Adam joins forces with Betty and Cindy who fight alongside him in

the quest to vanquish Xander from the game. Through plot twists revealed during the Second Act, either Betty or Cindy are discovered as a spy, and either Adam or Cindy are captured. The PC must escape or assist in an escape from captivity and defeat the Spy. A

second Spy must be defeated to continue. Once the spies are defeated, the Protagonist continues on to fight against Xander. At the Third act the Final Battle between Good and Evil takes place and based on the story line a second reveal

tells the story of Clandestine Espionage of the highest caliber. The final battle reveals that the spies thought of as Enemies, were never spies at all. Rather the PC was brainwashed during captivity to fight for Xander and his Empire.
